OMINA UVC + wireless charger & UV lamp sterilization box

- This portable ultraviolet sterilization box can be widely used with personal items such as mobile devices, Xiaomi wearables, Apple Watch, watches, earphones, makeup tools, jewelry, credit cards, etc.
- Very suitable for daily use at home, office or travel.
- UVC ultraviolet rays can kill 99.9% of Staphylococcus aureus and Escherichia coli within 18 minutes, and 99.9% of Staphylococcus aureus within 30 minutes.
- VUV ultraviolet wavelength can produce ozone sterilization which at same time the UVC ultraviolet lamp can not reach, to improve the sterilization range.
- Ultraviolet sterilization box also features a wireless charging function, supports Android 10W / Apple 7.5W and AirPods series wireless charging.
- Via oil drip hole, you can also sterilize and add a little fragrance oil at the same time, so that the device can achieve a fragrant and pleasant refreshing effect while disinfecting.
- Two disinfection modes: 18-minute quick mode, short press of a button / beep once / green light is on; 30-minute full mode, quick press of two buttons / forcing twice a sound / blue light on.
- 1 year warranty
