The Artwizz Bumper is a durable smartphone bumper case that reliably protects your iPhone 8's corners and edges. It fits firmly around the edge of your smartphone and offers shock-proof impact protection. Thanks to its slightly raised edges, when you place your device on a flat surface the Artwizz Bumper prevents the display and back of your mobile device from scratches and abrasions. The protective bumper case is made of scratch-resistant TPU, which also ensures that you can hold your device comfortably and without risk of it slipping from your hand. The ultra-slim, translucent design of the Artwizz Bumper ensures that it harmonizes perfectly with your smartphone, allowing the original colour of your device to shine through, without adding unnecessary bulk. All ports and buttons remain freely accessible at all times and can be operated without restriction.
