The Artwizz SecondDisplay offers optimum screen protection for your Galaxy Watch (42 mm) without altering the original haptics of your display. With impressive crystal clarity, the SecondDisplay's safety glass boasts a superior, high-quality feel. This is all thanks to its unique, triple-layered combination of materials. As a result, our safety glass is extremely robust and protects against scratches and shattering. Our safety glass will even prevent your screen from breaking in the event of a serious fall. The hardened surface also shields your screen from damage caused by sharp-edged objects. This means that both our safety glass and your device's screen will enjoy very long lives. And applying the safety glass couldn't be easier. The screen protector's special silicon coating guarantees effortless adhesion. All you have to do is tap it once and your SecondDisplay will hold itself securely in place. As our safety glass doesn't use any adhesives, you can easily remove it without leaving any annoying residues on your display.
