- Strong and reliable protection against scratches, wear and impacts
- Ultra-thin and elastic
- Combines different surface finishes: top two thirds transparent, lower third matt

The Artwizz NextSkin is ultra-slim and provides optimum protection against scratches, signs of wear and light impacts. The top two thirds of the case are see-through, allowing the iPhone 11 Pro Max design and logo to shine through, while the lower third is in the same color but matt. Ultra-slim and elastic at the same time, the case is both comfortable to hold and secure in your hand thanks to its ultra-grippy, non-slip surface. What's more, our ingenious Dot Technology means no unsightly suction spots can develop between the glass protector and your device's display. As the name NextSkin suggests, the case is just like a second skin and fits snugly around the device to provide reliable protection.
