- Recommended tripod for use with the Seek Thermal Seek Scan System
- Tripod height from min 68cm to max 159 cm
- Tripod legs and middle-console made of eloxierted aluminium
- Tripod carrying and storage case included
- Made by Cullmann, a leading German Tripod Manufacturer

Primax 380 - Recommended for use with the Seek Thermal Seek Scan System. Two tripods are necessary for Seek Scan; one to hold the Seek Thermal Camera/Digital Camera, and a second one to hold the Fixed Heat Source.

Tripod legs and centre column are made of anodized aluminium profile. The top tripod leg segment is covered with a robust foam padding. The clamping center rod ensures a stable hold. The precision centre column adjustment with crank handle drive and the quick release clips for tripod leg adjustment ensure convenient working.

The robust camera plate with skid-proof cork padding and standardized 1/4 inch camera

connection screw ensures secure hold.

The PRIMAX 380 is a reliable tripod well designed for Seek Scan. 3 year warranty.

Height ranges from min 68cm to max 159 cm.

Features of the PRIMAX tripod series:

Tripod legs and crank-operated centre column made of anodized aluminium profile

Protective foam padding of the top tripod leg segment

Torsion resistant and robust tripod star

Variably adjustable centre bracing for more stability

Precision crank drive for centre column adjustment

Skid resistant rubber feet, moveable by 360 degree

Convenient quick-action leg clips for comfortable tripod assembly and disassembly

Stable stand due to secure tripod leg clamping

Tripod bag with adjustable shoulder strap
