- The smart little button that controls devices without an app
- Control devices and scenes
- Four buttons, 12+ functions
- Integrated environmental sensors
- Control devices from other manufacturers

The smart button with four buttons for light, music, blinds and everything else. Includes sensors for temperature and - for the first time - humidity. 4 buttons, up to 3 functions per button.

Make your Smart Home simple

WiFi Buttons fit everywhere and make your Smart Home accessible to everyone, in a simple and understated way.

The one plus - more comfort

The four buttons with press, double press and long press functions make WiFi Button Plus the perfect remote control for lights, SONOS speakers, SYMFONISK speakers (via myStrom app) and

electric blinds (with dingz or Shelly actuators).

The other plus - practical environmental sensors

A WiFi Button Plus also measures temperature and humidity, which predestines it for a variety of useful automations: Ensure optimal climate conditions in the wine cellar, optimise your heating performance and let myStrom control your devices via sophisticated actions (for example, via a myStrom WiFi Switch and a humidity action).

Control devices from other manufacturers

With a myStrom Home, you can also control devices from Philips Hue, IKEA TRÅDFRI and Shelly with the WiFi Button Plus.

Countless possibilities thanks to IFTTT

With the IFTTT app (free for myStrom customers), a myStrom WiFi Button can control almost everything that is internet-based, for example: sending notifications, occupying a room via calendar, voting, ordering coffee or even jumping to the next slide of a presentation - and much more.

(IFTTT automations for humidity and temperature values from 2023)

Also for your existing Smart Home

With a little know-how (or the right plugin), you can integrate a WiFi Button Plus into your existing Smart Home solution. We are compatible with many systems and offer a well documented REST API. The button firmware is even open source and can be adapted as desired.

Technical data

Wireless/WiFi standard: IEEE 802.11n / 2.4 GHz (1)

Size: 53 x 53 x 13 mm

Weight: 35 g

LED: Dot (white, green, red)

Print pattern: 12 (4x print short, print double, print long)

Batteries: Integrated rechargeable battery

Battery life: 70 days

Wall mount: Yes / magnetic

Operation at : 0-40 °C ; 0-85% humidity (non-condensing) (For indoor use only - keep away from moisture!)

Storage at: 10-60 °C ; 5-90% humidity (non-condensing)

Safety & EMI: CE

Warranty: 2 years (hardware)

Package contents: WiFi Button Plus, manual, charging cable (USB)

Requirements

- WiFi router/gateway (constant WiFi/Internet connection)
- myStrom account
- myStrom app
