- Thanks to Additional Modules and Netatmo Weather Station monitor your entire house.
- Additional Modules measure temperature, CO2 concentration and humidity.
- Add up to 3 Additional Modules to a Netatmo Weather Station.
- Additional Modules are sold individually and work with the Weather Station sold separately.

Use the additional modules to monitor air quality throughout your home. Whether in your bedroom or your children's room, in the living room or kitchen, thanks to the Netatmo Weather Station and its additional modules, you can now monitor the air quality throughout the whole house. Place an additional module in each room of the house and measure the temperature, the CO2 and the humidity in the room. You can then access all this information easily from the iPhone or Android app or the WebApp, while in the house or from the other side of the world. Add up to 3 additional modules to your Netatmo Weather Station. The additional modules are sold by the unit and work with the Netatmo Weather Station, sold separately.

Additional Smart Indoor Module powered by 4 AAA batteries (up to 1 year autonomy). Included.

Wireless connection (radio) between Additional Smart Indoor Module and main indoor module of the Station: long range 100 m / 330 ft (without obstacles).

PC & Mac through the Webapp (available for the two latest versions of: Chrome, Safari, Firefox and Internet Explorer)
