NodOn roller shutter module EnOcean allow you to turn smart and remotely controllable your motorized shutters. The module can be set up in any type of motorized shutter: roller shutter, awning, garage door, etc. It allow you to easily control your shutter and add a wireless and battery-less EnOcean remote or wall switch far away from your roller shutter. You can centralize the control of the roller shutters of a room or all the house thanks to NodOn roller shutter module. The module is compatible with the majority of the smart home hubs of the market, allowing you to launch scenarios to optimize the shutters lowering or opening for more comfort. Directly compatible with Homee EnOcean and Afriso HG01gateway.
