- Transform your smartphone or tablet into a thermal camera with a 320x240 thermal sensor
- Find and fix fast by seeing problems invisible to the naked eye such as: energy loss, electrical and mechanical failures, water damage
- Perfect tool for do-it-yourself homeowners, contractors, builders, and engineers
- Does not require batteries or charging. Waterproof case included. Free Seek mobile app.
- SPECS: 320 x 240 Thermal Sensor, 32° Field of View, < 15 Hz Fast Frame Rate, Focusable Lens, -40C° to 330°F Detection Range, Captures Photos & Videos, Spot Temperature, High-Low Temperature, Threshold Mode, 9 Color Palettes.

Seek Thermal CompactPRO imager plugs directly into your Smartphone. CompactPRO employs wide, 32 degree field of view that is ideal for use both indoors and close-range outdoors, allowing you to detect thermal Energy up to 300 meters away. Seek Thermal CompactPRO is perfect for contractors, professional trades, inspectors, structural auditors and DIY homeowners.

Works in total darkness, broad daylight, or obscured visibility conditions. Compact has no battery - it uses the battery of the smartphone. Typical constant use can be up to 2 hours.

Compatible with most Android Smartphones with Micro-USB port, like Samsung, HTC, Motorola, Google, Sony Xperia. Note regarding Powered USB On The Go (also known as OTG) - Not all Android devices can run USB peripherals. If your phone can connect to a USB hard drive, it has OTG capability, and should be able to support the Seek Compact imagers. Please check your phone specification, if it supports OTG.

CompacPRO comes with a pocket-sized, waterproof Carrying Case.
